Directory Management

Save time and be more secure by automating Active Directory and Entra ID management

Netwrix Directory Management empowers organizations to streamline identity and directory operations across Active Directory, Entra ID, and Google Workspace, while also automating user and group-related tasks in Exchange and Microsoft 365. By combining auditing, password policy enforcement, and automated user and group lifecycle management, it helps IT teams reduce workload, apply least privilege principles through scoped delegation and access controls, and maintain operational efficiency. With visibility into directory changes and automated issue resolution, organizations can minimize service disruptions—all with minimal setup and rapid deployment.

EFFICIENT MANAGEMENT

Automate user provisioning, password resets, and group management to free IT teams from repetitive tasks.

ENHANCED SECURITY AND COMPLIANCE

Enforce least privilege access, reduce security risks, and ensure adherence to regulatory requirements.

MINIMIZED DOWNTIME AND BUSINESS DISRUPTION

Identify and resolve access issues before they disrupt operations and quickly restore AD from accidental deletions or unauthorized changes to minimize downtime.

Netwrix Auditor

Netwrix Directory Manager

Netwrix Password Policy Enforcer

netwrix

Automate your Directory Management

AUTOMATED USER AND GROUP MANAGEMENT

Forget the headache of manual account management. Automate user provisioning, password resets, and group updates to ensure employees get the right access when they need it, minimizing helpdesk tickets and manual management.

PASSWORD POLICY ENFORCEMENT

Enforce flexible password policies to ensure that passwords are strong, unique and compliant. Block weak and compromised passwords while ensuring smooth authentication without adding complexity for IT teams.

GROUP LIFECYCLE AND ACCESS MANAGEMENT

Reduce manual intervention by automating group creation, membership updates, and access control. Maintain an organized directory structure and prevent unnecessary access accumulation over time.

VISIBILITY INTO DIRECTORY CHANGES

Improve troubleshooting speed and security oversight by tracking and auditing all changes in Active Directory and Entra ID. Get alerted to risky changes early so you can investigate and remediate them before they cause problems.

ACCESS REVIEWS AND PERMISSIONS AUDITING

Ensure users have the right level of access by automating permission reviews and tracking changes. Generate audit-ready reports to validate and adjust permissions as needed to maintain security and efficiency.

EMPOWER USERS WITH SELF-SERVICE

Delegate the management of accounts and group memberships, reducing administrative workload. Allow users to securely reset their passwords without IT assistance, supporting uninterrupted access and lowering helpdesk costs.

WHY NETWRIX?

ALL-IN-ONE DIRECTORY MANAGEMENT

Automate user and group management, enforce security policies, and monitor changes —all in one unified solution that simplifies operations and reduces IT overhead.

SEAMLESS INTEGRATION

Netwrix works with existing ITSM, ticketing, and security tools, enabling IT teams to automate directory tasks without disrupting their current workflows.

FASTER DEPLOYMENT, IMMEDIATE VALUE

Netwrix Directory Management deploys quickly with minimal setup, enabling IT teams to start automating directory tasks and improving efficiency in hours, not months.
